

ETHAN YANG

Berkeley, CA | (714) 469-4332 | yang_ethan@berkeley.edu | [linkedin.com/in/ethanyang10](https://www.linkedin.com/in/ethanyang10) | github.com/ethannyang

EDUCATION

University of California, Berkeley | B.A. Computer Science, B.A. Data Science

Expected May 2027

Honors: Regents' Scholar (Top 1% of Class), Congressional National App Challenge Winner (1st)

Coursework: Data Structures & Algorithms, Machine Structures, Computer Architecture, Discrete Mathematics, Linear Algebra Database Systems, Cybersecurity, Random Processes, Data Mining, Data Inference, Business Analytics, Probability Theory

PROFESSIONAL EXPERIENCE

Software Engineer Intern | Harvey

June 2026 - Aug 2026

- Saved Harvey **\$30M~** of annual conversation token spend by building an industry standard auto-context management system used by **OpenAI and Anthropic** for Harvey's flagship AI chat product, cutting from a 1M token window into 272k
- Achieved **~95% prompt-cache hit rates** across over **1.3M weekly threads** on the summarization by designing a host-model fork implementation that takes advantage of **10x cheaper** warm cache read pricing versus regular pricing
- Shipped UI (context ring, nudge banners) to keep conversations transparent when a summary is applied to users

Software Engineer Intern | Lucid Motors

Sep 2025 - Dec 2025

- Developed a full-stack AI-powered intelligence dashboard for Lucid's portfolio team, projected to **save 12+ hours** of manual research weekly by automating the real-time tracking of industry shifts, competitor moves, and market opportunities
- Engineered a **3+ multi-agent backend** (FastAPI, LangChain) to process natural language queries into structured JSON plans and building the interactive React/Tailwind frontend to visualize data from Exa API and Supabase

Machine Learning Intern | Claythis

June 2025 – Aug 2025

- Cut manual animation prep time by engineering a diffusion-based video pipeline that automates the conversion of 2D character images into standardized A-poses, enabling use across **5+ diverse character archetypes**
- **Reduced animation jitter by 25%** by developing an A-pose transition model with improved alignment and interpolation
- Preserved character integrity in latent video diffusion by fine-tuning with pose encodings + cross-attention; reduced visible distortion across test clips

Software Engineer Intern | eKadence Learning Foundation

June 2024 – Aug 2024

- Drove a **40% increase in monthly usage** of the ePortfolio feature by leading 5 eng/design interns through a UI overhaul informed by customer feedback + usability tests (tracked in Jira)
- Prototyped **3 new platform features** (mobile app, forums webpage, AI chatbot) that secured executive approval for rollout

ENGINEERING PROJECTS & LEADERSHIP

Souma | League of Legends AI Coach Overlay

2025 UC Berkeley Hackathon - [Devpost/Github Link](#)

- Built an AI suggestion software that analyzes live game-state to give the most optimal move in real-time (Riot + OpenAI)
- Engineered a low-latency FastAPI/WebSocket data stream to an Electron/React overlay, powering a dual AI algorithmic system (Rule Engine + LLM) that provided instant coaching and accepted voice-input for user-specific questions

Chief Technology Officer | Spero Apparel

Dec 2024 – Present

- Led a **5 engineer team** to design, develop, and launch Spero's website and design showcase from the ground up
- Drove **\$5k+ in revenue** and increased overall sales by 70% by building a webstore that streamlined **90% of all purchases**
- Managed a biweekly release cycle for new features/redesigns, coordinating with board to align with new product drops

Vice President of Development | Product Space

Aug 2024 – Present

- Connected **50+ STEM students** to multiple, industry-focused projects with teams from Google, Meta, YC startups, and more; contracting over **\$45k in club revenue** and developing professional skills and relationships for students
- Organized speaker panels, networking events, and workshops by outreaching to club alumni and industry professionals

TECHNICAL SKILLS & ACTIVITIES

Languages: Python, Java, C/C++, JavaScript, TypeScript, SQL, HTML/CSS, RISC-V, Shell, Swift

Libraries/Frameworks: React.js, Next.js, Pandas, Hugging Face, MMPose, React Native, OpenCV, FastAPI, PyTorch, TensorFlow

Developer Tools: Git, Supabase, PostgreSQL, Firebase, AWS, Postman, PowerShell, MongoDB, Groq, Pinecone, Docker, MySQL

Activities: Berkeley CS 61B Course Staff, ASUC Senate, Product Space, Spero Apparel, Soon Movement Global (Mentor)
